Safari Index 1

The screenshot shows a Mac OS X desktop with a Safari browser window open. The title bar reads "Safari" and "file:///Users/School/Desktop/git215/final/index.html". The main content area displays the homepage of "Summit Haven Resort". The header features a dark banner with "Summit Haven Resort" and three buttons: "Home", "Accommodations", and "Contact". Below the header is a large, scenic photograph of a mountain valley with green forests and a winding river. A dark, rounded rectangle contains the text "Relax, Explore, Enjoy". Underneath is a paragraph describing the resort's amenities, mentioning an Italian restaurant, spa, and climbing wall. To the left of the text is a smaller image of a wooden chalet in a snowy mountain setting. To the right is a section titled "Amenities and Options for Everyone" with descriptive text. The bottom of the screen shows the Mac OS X Dock with various application icons.

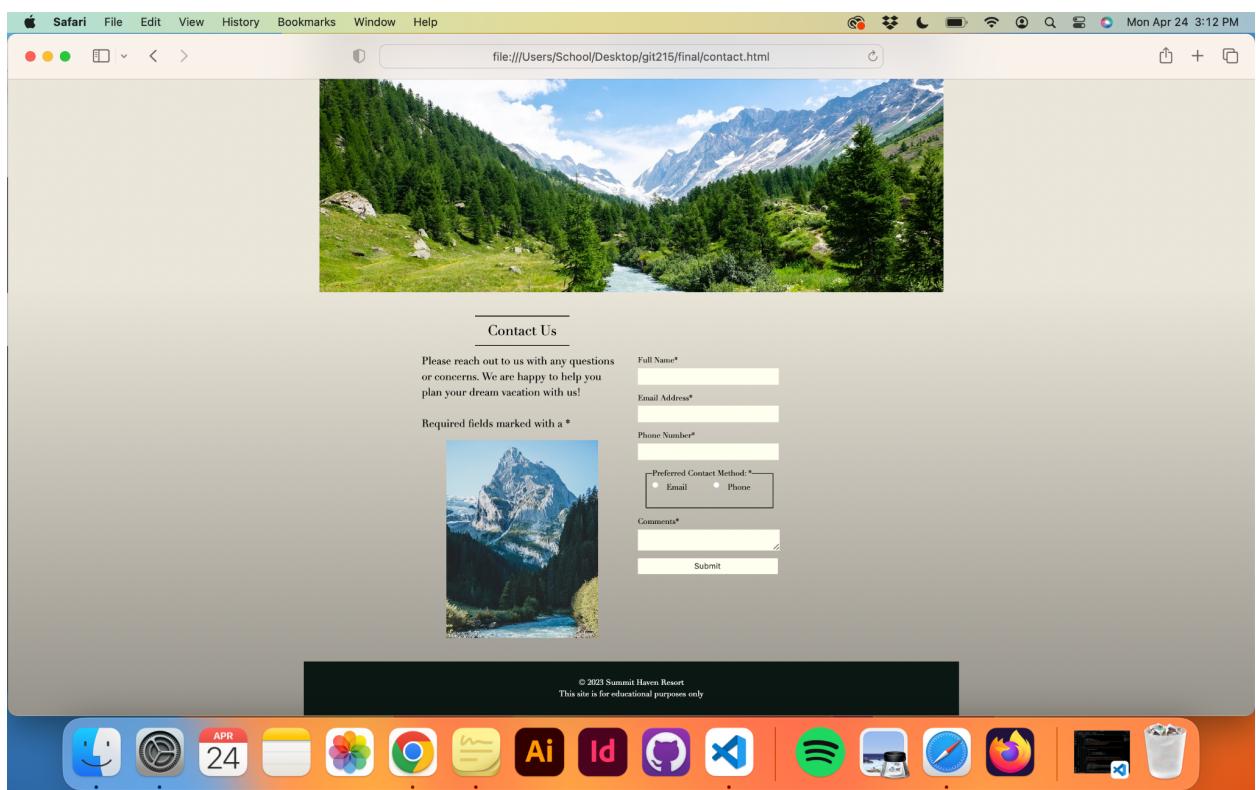

Safari Index 2

The screenshot shows a Mac OS X desktop with a Safari browser window open. The title bar reads "Safari" and "file:///Users/School/Desktop/git215/final/contact.html". The main content area displays the contact page of "Summit Haven Resort". At the top is a large, scenic photograph of a mountain valley. Below it is a section titled "Contact Us" with a paragraph encouraging users to reach out with questions or concerns. It includes fields for "Full Name*", "Email Address*", and "Phone Number*". There is also a "Preferred Contact Method" section with radio buttons for "Email" and "Phone". A "Comments*" field and a "Submit" button are at the bottom. In the bottom right corner of the content area, there is a small footer note: "© 2023 Summit Haven Resort" and "This site is for educational purposes only". The bottom of the screen shows the Mac OS X Dock with various application icons.

Testing Differences:

I was not able to get a full page view when zooming out of my page when viewing on Safari. Besides that, there weren't a lot of differences. The one thing I noticed was that my comment box had an enlarged pull down icon in firefox, but this was only the case when I zoomed out.
